

The Scala CL-FMRX is a ruggedly built, log-periodic antenna, designed for professional FM receive applications.

Like all Scala antennas, the CL-FMRX is made of the finest materials using state of the art electrical and mechanical designs resulting in superior performance and long service life.

The CL-FM may be used stand alone or in stacked arrays for higher gain, increased side-lobe suppression, or custom azimuth patterns.

\*Mechanical design is based on environmental conditions as stipulated in TIA-222-G-2 (December 2009) and/or ETS 300 019-1-4 which include the static mechanical load imposed on an antenna by wind at maximum velocity. Contact KBU for further details.

Azimuth pattern (E-plane)

Elevation pattern (H-plane)

**CL-FMRX/HCM**  
Horizontally polarized

**CL-FMRX/HRM**  
Horizontally polarized

**CL-FMRX/VRM**  
Vertically polarized

Vertically polarized antennas require lateral stabilization, (not supplied) to prevent the antenna from turning on the mounting pipe.
